

## Perform 24x7 remote monitoring of facilities with physical security hardware managed in the Cloud.

DARBY CONSULTING HELPS GROWING ENERGY COMPANY INCREASE SECURITY OF NEW FACILITIES

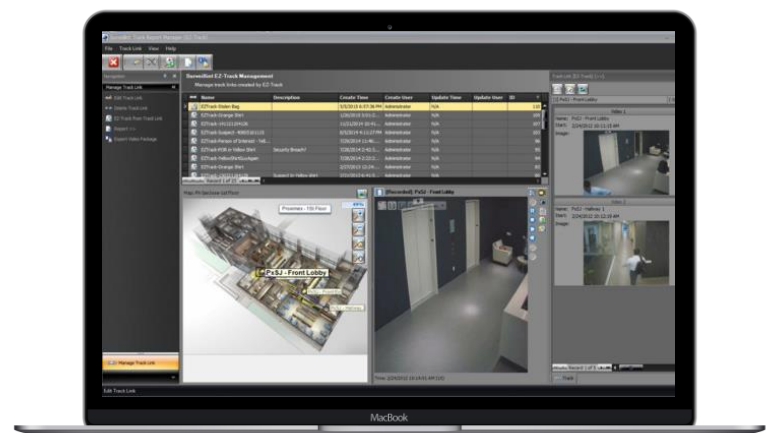

Darby Consulting helped a growing energy company operating in the Permian Basin to implement a new Physical Security Information Management System (PSIM) to perform 24/7 monitoring of all new and existing facilities in the Cloud.

### PROBLEM:

Hiring on average 8 new employees a week, the energy company was experiencing tremendous growth requiring the new facilities to be acquired and security systems installed at an accelerated pace. The security department was searching for a new security software system to perform 24/7 monitoring of all facilities to replace a siloed environment of managing security at the local facility level. With limited IT resources with experience in Physical Security Information Management Systems (PSIM), Darby was selected to plan and implement the project.

### ABOUT PHYSICAL SECURITY INFORMATION MANAGEMENT (PSIM) SOFTWARE:

Physical security information management (PSIM) is a category of software that provides a platform and applications created by middleware developers, designed to integrate multiple unconnected security applications and devices and control them through one comprehensive user interface.

### PROJECT MANAGEMENT:

Darby Consulting provided a specialized team of **IT Project Management** professionals to support the project with:

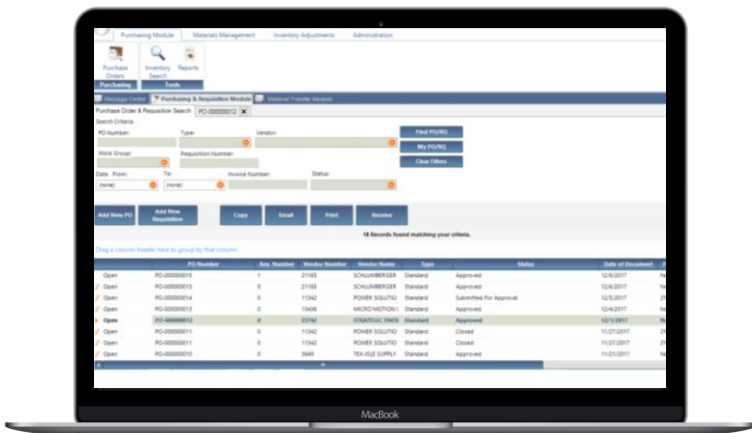

- Requirements Gathering / Business Analysis
- Business Process Redesign
- Technical Systems Design
- System Testing
- End-user Training
- Change Communications
- Project Management

### ABOUT DARBY CONSULTING:

IT project delivery is what we do. For over 10 years, we've helped growing organizations consistently deliver successful IT projects – both software and hardware. We've pioneered innovative methods and tools tailored specifically for your success. And we're affordable; we've built a cost-effective operating model so we can offer exceptional IT project services at prices that will surprise you. This means **more projects completed on-time**, higher end-user satisfaction, and increased growth for your organization.

### INNOVATIVE METHODS & TOOLS

We continuously pioneer **innovative new methods** to plan and deliver IT solutions. The result? An IT Project experience that is customized and results driven for every project.

### THE RESULTS:

Darby accelerated the project schedule by 5 months and delivered the project within budget across all facilities in Texas. The energy company was able to better collect and correlate events from disparate security devices and information systems (video, access control, sensors, analytics, networks, building systems, etc.) to empower personnel to identify and proactively resolve situations. PSIM also provided increased control, improved situation awareness and management reporting which led to improved efficiency to provide security leveraging the Cloud.

Let us help you deliver your next physical security project.
