

Deliver more IT projects at a lower cost with better people, processes and technology

DARBY CONSULTING PROVIDES FULL-SERVICE PROJECT & PORTFOLIO MANAGEMENT SOLUTIONS

We believe that strong and reliable project management support should be easily accessible to growing organizations. That's why at Darby, we have built a cost-effective PMO model fueled by innovation and technology. This allows us to offer exceptional IT project services at an affordable price. Between our people, methods and tools - we consistently deliver projects with time, budget and scope.

CERTIFIED PMO PROFESSIONALS

At Darby, successful projects begin and end with trusted experience. Using a process backed by data science and years of expertise, we find, train and develop the best IT PMO professionals with both a technical and cultural fit to match our clients' needs and exceed their expectations.

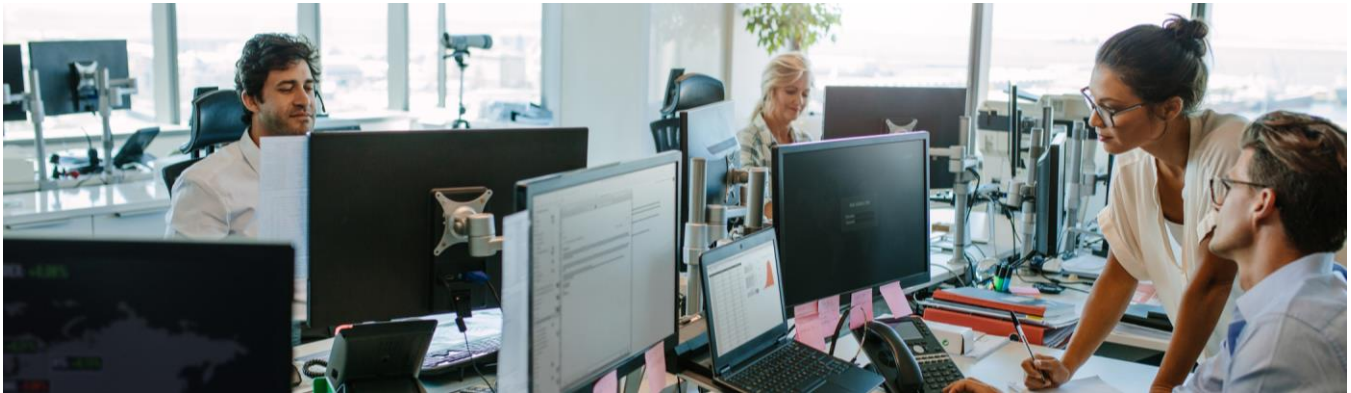

MATURE PMO PROCESSES

We believe your IT Consulting firm should deliver more than just people. That's why we continuously pioneer innovative and mature methods to plan and deliver IT projects. Our Project Management for IT™ methodology is backed by the Project Management Institute and includes a library of over 70 tools and templates accelerate our performance on every project.

CLOUD-BASED PORTFOLIO MANAGEMENT SYSTEM

We plan and manage our projects utilizing a cloud-based Project & Portfolio Management System to help keep our clients and consultants connected in real-time so everyone knows where we stand. We use it to document and track requirements, identify issues & risks and monitor the completion of tasks. The result? Projects consistently delivered on-time, on-budget and within scope.

Deliver more projects at a lower cost with better people, processes and technology

DARBY CONSULTING HELPS GROWING ENERGY COMPANY SAVE \$1.8M ACROSS IT PROJECTS

Darby Consulting helped an independent oil company operating in the Permian Basin to plan and implement a large portfolio of software and hardware related IT projects focused on transforming business processes across land acquisition, drilling and completions, operations, legal, risk and accounting departments.

PROBLEM:

Given the increased number of projects needed to support a business in hyper-growth, the client needed to more than double the size of its IT department with seasoned IT project managers, business analysts, QA testing and training specialists with expertise in planning and implementing complex hardware and software projects relevant to the oil and gas industry. In addition, the client's headquarters were located in Austin, TX where there were few professionals with the industry experience required. The client also needed to implement a PMO office to achieve greater coordination and quality standards.

SOLUTION

Darby Consulting leveraged its network of over 1,000 IT professionals across Austin, Houston, Dallas and San Antonio to assemble a full-time, dedicated team of experienced consultants with energy IT experience to execute the client's portfolio of projects. A dedicated project coordinator was also assigned to quickly facilitate the search and screening of potential candidates. Darby established corporate apartments and coordinated all logistics to relocate hard-to-find experts to Austin. All travel costs were included in the client's bill rate which was 30-40% below that of other consulting firms. All project members received Darby's proprietary onboarding orientation and IT project success training as well as access to our cloud-based PMO system. In the first year, Darby saved the client \$1.5M in consulting fees, \$300,000 in travel cost and \$50,000 in enterprise project management software for a total savings of \$1.85M.
